

DEVELOPING QUALITY TEACHING & LEARNING

The quality of teaching is the most critical factor in improving children's literacy and learning outcomes. That's why CODE's Teaching and Learning Framework is at the core of all our literacy initiatives. We focus on developing teachers' knowledge, skills, praxis, responsiveness and agency. By aligning with our guiding principles of relevance, local ownership, support for independence and continuous improvement, we pave the way for lasting, long-term success.

Guiding Principles in Process
